Re: City of Aurora CSO  
NPDES Permit No. IL0048518  
Bureau ID W0894070001  
Modification of NPDES Permit (After Public Notice)

**Permittee:**  
The Illinois Environmental Protection Agency has reviewed the request for modification of the above-referenced NPDES Permit and issued a public notice based on that request. The final decision of the Agency is to modify the Permit as follows:

1. City of Aurora has determined the recommendations already implemented in the LTCP have been significantly more effective than anticipated. As a result, the City can reconstruct CSO 001 instead of adding storage at the outfall. The City is replacing the current "Treatment and Storage Projects" seen below:

**Treatment and Storage Projects:**

1. Green Infrastructure	December 31, 2022
2. CSO 001 Storage Facility	December 31, 2025
3. CSO 001 Treatment Facility	December 31, 2026
4. CSO 004 Pump Station Force-main	December 31, 2028
5. CSO 001 Additional Storage System	December 31, 2030

With the new following projects:

**Treatment and Storage Projects:**

1. Install Cellular Telemetry at CSOs	December 31, 2025
2. Remove Kayak Launch near CSO 001	December 31, 2025
3. Planning Document to Reconstruct CSO Outfall 001	December 31, 2026
4. Submit Plans and Specifications for CSO Outfall 001	December 31, 2028
5. Begin Construction on CSO Outfall 001	December 31, 2028
6. Report on Progress on Reconstruction of CSO Outfall 001	December 31, 2029
7. Complete Construction	December 31, 2030

Pursuant to the Final NPDES Electronic Reporting Rule, 80 FR 64064 October 22, 2015, all permittees must report DMRs electronically unless a waiver has been granted by the Agency. The Agency utilizes NetDMR, a web-based application, which allows the submission of electronic Discharge Monitoring Reports instead of paper Discharge Monitoring Reports (DMRs). More information regarding NetDMR can be found on the Agency website, <http://epa.state.il.us/water/net-dmr/index.html>. If your facility has received a waiver from the NetDMR program, a supply of preprinted paper DMR forms will be sent to your facility. Additional information and instructions will accompany the preprinted DMRs. Please see the attachment regarding the electronic reporting rule. For assistance, call 217-782-9720 and ask to speak to the specialist for your region.

The attached Permit is effective as of the date indicated on the first page of the Permit. Until the effective date of any re-issued Permit, the limitations and conditions of the previously-issued Permit remain in full effect. You have the right to appeal any condition of the Permit to the Illinois Pollution Control Board within a 35 day period following the issuance date.

Should you have questions concerning the Permit, please contact Karol Desai at 217/782-0610.

Sincerely,  
  
Brian D. Fleming, P.E.  
Manager, Municipal Unit, Permit Section  
Division of Water Pollution Control
